Preparation Questions for March B1 Integration Meeting
Risk Stratification

1. How do you identify your high-risk and rising risk population? Does your organization use a structured method to determine what populations are considered high risk?

2. Is this method connected to your Electronic Health Record (EHR) or is it outside your EHR?

3. Do you have or will you have a team to focus on risk identification? If so, who is on your team?

4. Do you use the Comprehensive Core Standardized Assessment (CCSA) to help identify high risk patients?

5. Do you us the Collective Medical (CM) platform to help identity high risk patients?

6. Do you take into consideration Social Determinants of Health as part of your risk stratification model?

7. Do you set up a Shared Care Plan for those identified as high risk?

8. If you have a risk stratification tool, how often is it updated?

9. Do you use a registry to stratify the risk of your patients?
